DEAR FRIENDS!

The NGO "Civilizational Development of Ukraine" is considering the possibility of participating in the international co-production grant program offered by the Goethe-Institut for projects in the field of theater, music, dance, and performing arts created in cooperation between Ukrainian and German artists.

To participate in the program, the organizers propose creating a children's puppet theater performance for young viewers in the capital of Ukraine and for children-migrants from the territories of Ukraine occupied by Russian troops.

On the Ukrainian side, the team of the Kyiv Municipal Academic Puppet Theater on the left bank of the Dnieper in Kyiv gave consent to participate in the project.

Currently, a search is underway for partners - puppeteers from Germany. Namely, the project requires two actors (a man and a woman) from Germany, who, if awarded a grant, could come to Ukraine to the city of Kyiv to directly participate in the work on the project.

The implementation of the project with the participation of German fellow artists is tentatively planned for early July 2026, after the completion of the preparatory period, and will last no longer than a week. Before that, the project participants will communicate online.

The project organizers will cover the transfer to Kyiv, accommodation and daily expenses for meals of the German actors. The honorarium will be agreed upon during negotiations with the candidates.

The project participants from the Ukrainian side, - the NGO "Civilizational Development of Ukraine" and the Puppet Theater on the Left Bank of the Dnieper, - guarantee hospitality, good mood, interesting work and pleasant communication during the implementation of the project.

Sincerely,

Chairman of the Board of the Public Organization  
"Civilizational Development of Ukraine"

Taras Borovok
